Appendix of Resources

This appendix is designed as a supplement to the textbook *The Autism Spectrum in the 21st Century: Exploring Psychology, Biology and Practice*, and to the Open University Module SK124, to enable you to acquire further information about autism. The choice of organisations and publications in the appendix represents a selection from a much wider range, and does not necessarily mean that we endorse these particular organisations and publications over others. The contact information provided for each entry was correct at the time of compiling this appendix.
